EDUCATION

Bina Nusantara University
Bachelor of Computer Science

Tangerang
2024 – Present

SMA Santo Tarcisius Dumai
Senior High School

Dumai
2021 – 2024

EXPERIENCE

Freshmen Partner
Bina Nusantara University

2025 – Present
Tangerang

- Mentored first-year students during orientation and adaptation programs.
- Facilitated discussions and supported freshmen in adjusting to university life.

Director of Photography
OSIS SMA Santo Tarcisius Dumai

2021 – 2024
Dumai

- Led documentation for school events and organizational activities.
- Managed media archives and publication across school platforms.

PROJECTS

PlaScans – Plastic Waste Classification AI | *Teachable Machine, HTML, CSS, JavaScript*

2026

- Developed an AI-powered web application for plastic waste classification using a custom Teachable Machine model.
- Collected and labeled datasets and integrated TensorFlow.js for real-time prediction.
- Deployed the application using Netlify.

Eventra – Concert Discovery & Ticketing Platform | *Flutter, Node.js, Express.js, MySQL*

2026

- Engineered a full-stack concert ticketing platform with event discovery and booking features.
- Designed REST APIs for authentication, ticket booking, and event management.
- Integrated Google Maps, image uploads, JWT authentication, bcrypt, and Dockerized backend services.

Wuthering Wares – Full-Stack Marketplace Platform | *Flutter, Node.js, Express.js, MySQL*

2026

- Developed a full-stack marketplace application using Flutter and Express.js.
- Built REST APIs for authentication, catalog, wishlist, and order management.
- Integrated Google Sign-In, Facebook Login, and JWT authentication.

Love Letter Gacha Platform | *HTML, CSS, Node.js, JavaScript, Midtrans QRIS*

2026

- Developed a digital letter platform with secure sharing and premium access.
- Integrated Midtrans QRIS payment gateway and webhook verification.
- Designed REST APIs and token-based access control.

Home Automation System Using ESP32 | *ESP32, Arduino, IoT*

2024

- Developed a home automation system with automatic lighting and smart trash bin features.

TECHNICAL SKILLS

Languages: JavaScript, Python, C, HTML, CSS

Frameworks: Flutter, Node.js, Express.js

Databases: MySQL, JSON

Tools: Git, GitHub, Docker, VS Code, Arduino IDE

Technologies: REST API, JWT Authentication, Google Maps API, Midtrans QRIS, ESP32, Arduino, IoT

Deployment: Railway, Netlify, VPS
